Sight Essential Evo Self 85"

Digital screens and display units for windows and doors

Description

SIGHT Essential Evo 85" is the 85'' 4K LED display totem for window and door showrooms. It is made from solid materials and durable electronics that give it a lifespan four times longer than a conventional screen. With its ultra-bright 700 Nit SIGHT Essential Evo 55" display, it has no problem maintaining consistent picture quality in all lighting conditions, even when directly illuminated by sunlight. Its clean, minimalist style makes it ideal for showrooms that make design and elegance their trademark; it blends naturally into any exhibition space. The reduced thickness of the structure and the absence of a frame on the display recreate the sensation of a real one-wing door, maximising the emotional impact on the customer. Thanks to the View digital platform, the represented product is configurable in real time and offers your customer the possibility to evaluate any detail in real scale, displaying every possible aesthetic combination in a simple and fast way. SIGHT Essential Evo 55" redefines the shopping experience and helps you offer and sell products in the best possible way, bringing all the benefits of e-commerce directly into your store.
